Subject: benzotriazole

Dear Sir and Madam,

I am a resident of the North Avondale Community in Cincinnati, geographically very close to Cincinnati Specialties, Inc., a subsidiary of the PNC Group. I frequently smell bezotriazole in the air. This has been shown to induce cancer in mice and rats.

I fear this is a danger to me, my family and neighbors. I urge that this chemical be examined by OSHA, and until it is proven safe for humans I would hope that PNC not be allowed to emit this chemical into the air.

Sincerely,

Dr. Robert I. Frankel
